PERSONAL PROJECTS

Portfolio Website

- Create a personal portfolio website to showcase your skills and projects. Use HTML, CSS, and JavaScript to design an attractive, responsive site that includes project descriptions and links.

E-commerce Web application

- Develop a complete e-commerce website using PHP, MySQL, HTML, CSS, and JavaScript. This project should cover: Product Listings: Display products with images, descriptions, prices, and availability status. Shopping Cart: Enable users to add and remove items from their cart, update quantities, and proceed to checkout. User Accounts: Implement user registration, login, and profile management.

Hotel Management System

- A Hotel Management System automates hotel operations, including reservations, check-ins/outs, room inventory, billing, housekeeping, and restaurant services. It improves efficiency and guest satisfaction.

Nursery management system

- Nursery Management System is designed to streamline the operations of a plant nursery or garden center. It helps manage plant inventory, sales, customer information, and other nursery-related tasks efficiently.
